

Greg A Sbrocco

**Global Supply Chain Leader
GE Transportation**

Greg Sbrocco is the Global Supply Chain Leader for GE Transportation. He is responsible for the sourcing and manufacturing of products for the rail, mining, marine, stationary power and drilling industries -- leveraging lean and digital solutions to improve customer lead times and optimize inventory across the value stream.

With 25 years of GE service, nine of which with GE Transportation, Greg came to this role from Global Services Supply Chain, where he was the General Manager. He has a strong reputation of delivering results and driving key business initiatives. Greg was instrumental in the production launch of the Tier 4 engine platform, optimizing service fulfillment levels for customers, and in transforming the Grove City Reman and new engine sites into showcase GE Brilliant Factories. He joined GE in 1992 as an Environmental Engineer for the GE Energy business. During his tenure with the Company, he has held several leadership roles in GE Energy, GE Oil & Gas and GE Transportation.

A Cleveland native, Greg attended Purdue University and graduated with a B.S. Degree in 1992.
